AT+CSDP=1 turns on reporting of SMS message length

ATE0, ATC

Look at AT+CMNI

0,0 → 0,7

0,1 → 1,7

1,1 → 1,7

1,0 → 0,7

Try sending group graphic to siemens S2S + ring tone from S2S to Norcia

Try receiving Type 0 message using downloaded SMS S/W.

Enable unsolicited +CTRA to catch cell crashes.

You must connect to Web before starting Java Web server for it to create the right endpoint.

SC address - AT&T 02.2E8 section 10.5.2E.7

DELIVER - AT&T 03.2E0 section 9.2.2.1

SUBMIT " " 9.2.2.2

DCS - AT&T 03.3E section 2E

Look at UDH1

Try e-mailing Dimitri Pochet (dpochet@hotmail.com) or delahaye@netaddress.com) about UCS2 + DCS on M20.

One of the PIDs allows you to mark the OA as capable of accepting voice calls (is this not always true?)

T.O.

8 8 r é ~ g n
8 10127 10155 10113 10129 10123 n

If an SMS is ~300 bytes + a single psm channel mobile to mobile @ 9600 bps costs 10p/min (presumably including some profit) then an SMS message should cost:

$$10 / \left[\frac{(9600/8) * 60}{300} \right] = 0.02p$$

So how come it costs 10p?

Strange that MTN stops being able to transmit to Eircell once Eircell works out how to charge for WebText.

TE, etc. in Europe have to put up with Kaufland, etc. one presumes due to regulatory requirements. However if MTN can be blocked how is SMS covered if at all by EU, etc. treaties?

While Eircell are not required to provide SMS, once they do, shouldn't they provide equal access to all originators. SMSes originating from other European networks aren't blocked so is MTN being blocked just for providing SMSing? And wouldn't interconnect rates compensate Eircell (the 10p/SMS is hardly a plausible interconnect rate I guess)?

Instant messaging: computer \xrightarrow{x} mobile
Look at ericsson keyboard pad

What providers offer some form of 03.38 interface style interface to their SMSC over TCP/IP or leased line setup.

Games - chess, jokes for bored travellers, text adventure cinema listings, etc.
We get charged a tiny amount for outgoing calls but get a big cut of the incoming fee

SMS to e-mail
